

Where design meets Renewable Energies and Domotics

In the industrial pole of Tortona, where one of the most advanced research centers for Photovoltaic technologies in Italy has recently been installed, **ECO DESIGN EXPO** brings an overview on the emerging technologies: a convention and show dedicated to Energy and Renewable Energies in buildings, Domotics.

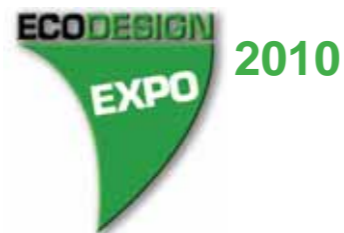

Complementing Mostra Convegno Agroenergia, focused on renewable energies in agriculture, ECO DESIGN EXPO places emphasis on Photovoltaic and Domotics, as well as on Energy Saving for buildings, with a particular attention to installers of photovoltaic systems.

Along with ECO DESIGN EXPO, AS-i Village, is a special area, highlighting automation components, with a particular regard for power generation control systems

FOCUS AREAS:

- ENERGY
- RENEWABLE ENERGIES
- BUILDING AND CONSTRUCTIONS
- DOMOTICS
- ENERGY SAVING

An **AdMil** event, in association with:

From 2 to 5 March 2010

The New Energies Week

Events not to be missed in the key Italian Agro-Energies District

AGROENERGIA

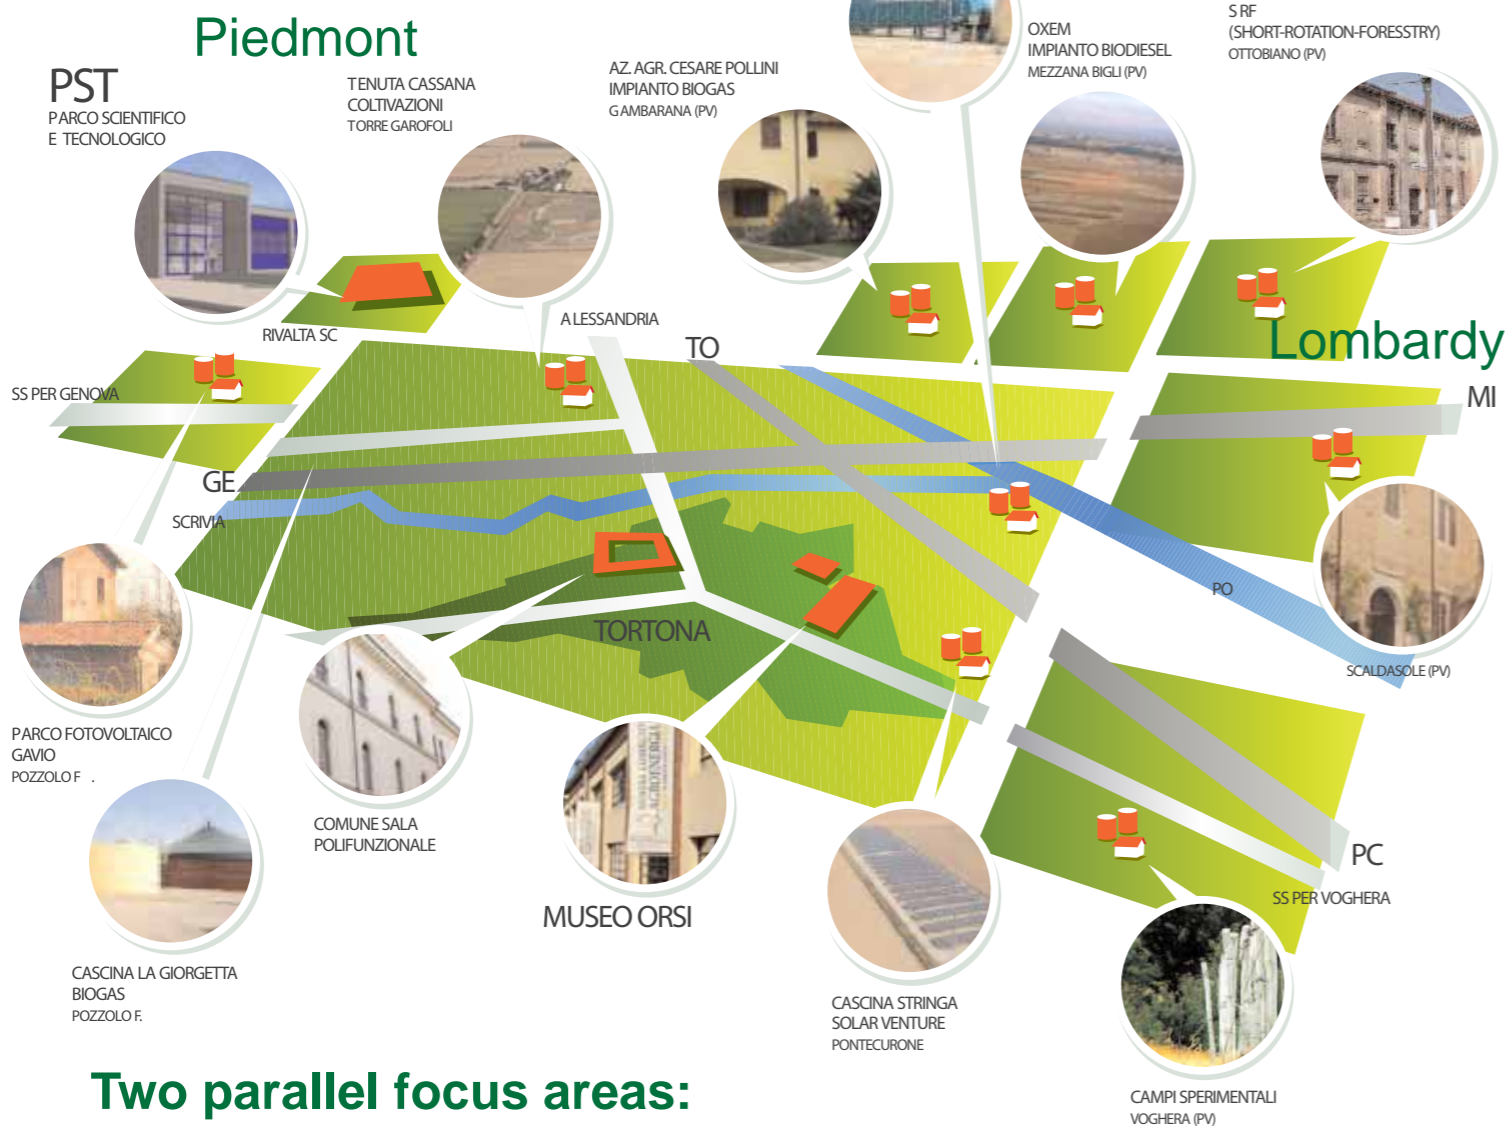

www.agroenergia.eu

Territorial bioenergetic nodes and the Innovation Poles

The piedmontese-lombard territory has been generally recognised as the key growth medium for the Italian agro-energetic production chain. A production district where nearly all technologies are represented, with recurring multi-tier interconnections.

On this fertile ground, the Innovation Poles programmes launched by the Piedmont Region have been implanted. Mostra Convegno Agroenergia is their natural showcase.

Two parallel focus areas: Agroenergies and Biofuels; Photovoltaic and Domotics

Along with **Mostra Convegno Agroenergia**, the new exhibition **Eco Design Expo**, will focus on Photovoltaic, Domotics, Energy Saving and Renewable Energies for the building and construction industry.

Among the special initiatives, AS-i Village, a space dedicated to process automation.

AGROENERGIES AND BIOFUELS

PHOTOVOLTAIC AND DOMOTICS

March 2010	morning	afternoon	afternoon
Tuesday 02	Global Bio-Ethanol Conference (Gruppo M&G) in Turin		
Wednesday 03	Workshop "A policy for Agroenergies" at PST in Tortona	Press event and visits to plants	Seminar for photovoltaic installers
Thursday 04	Energy from farming	Energetic solutions for communities, consortiums and municipal companies	AS-i seminar on plant automation
Friday 05	Biogas Convention	Spotlight on the Innovation Poles: the frontiers of research	National convention on photovoltaic thin-film technology

Innovation space: the new frontiers of bioenergies, biofuels and photovoltaic research

The Scientific Board of Mostra Convegno Agroenergia includes ten Italian universities and research institutes.

This fourth edition of Mostra Convegno Agroenergia offers the state of the art on the research for agro-energies and biofuels in Italy.

The second edition of the **Biogas Convention**, in association with Consorzio Italiano Biogas e Gassificazione will provide the profession's meeting point for technology suppliers, plant operators, as well as for all those interested in taking a closer look at the opportunities offered by this fast developing technology.
